Summary

Full Stack Developer with hands-on experience in building scalable web applications using React, Node.js, and MySQL. Experienced in developing production-ready systems with authentication, dashboards, and database-driven workflows.

Education

MCA **Chandigarh University**, Computer Applications Punjab, India
• Focused on full-stack web development and database systems 2023 – 2025

Experience

Koober Technology, Full Stack Developer India
• Worked as a Full Stack Developer for 6 months June 2025 – Nov 2025
• Built and deployed "Shrusti Clothing Management System" in production 6 months
• Developed responsive frontend using React
• Built backend APIs using Node.js and Express
• Designed and managed MySQL database schemas
• Implemented authentication, dashboards, and reporting modules

Projects

Shrusti Clothing Management System

A production-level full-stack web application used to manage clothing manufacturing workflow including staff management, wages, advance payments, and production tracking.

- Built using React, Node.js, Express, and MySQL
- Role-based login system (Admin & Staff)
- Staff-wise wage and advance payment management
- Production workflow tracking and real-time reports
- Interactive dashboards for operational monitoring
- Deployed and actively used in a live production environment

Research Brief Generator

A full-stack web application that converts 1-10 web sources into a structured research brief using LLM-assisted synthesis.

- Built with React (Vite), Node.js, Express, Supabase, and Groq LLM API
- Structured output: summary, key points, conflicting claims, verification checklist, citations
- Implemented Axios + Cheerio scraping layer
- Stored generated briefs in Supabase (PostgreSQL JSONB)
- Production deployment using Netlify (frontend) and Render (backend)
- GitHub Repository: <https://github.com/Aman-srivastava1608/Research>
- Live Backend API: <https://research-6a74.onrender.com>
- Status endpoint for backend, database, and LLM health monitoring

Skills

Frontend: React, HTML, CSS, JavaScript, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Database: MySQL, Supabase (PostgreSQL)

Tools: Git, GitHub, VS Code

Deployment: AA Pannel, environment variables, domain setup, production configuration
